

Study: Bischoff et al. 2021

Category: Lung

3CA version: 2

Number of samples: 20

Number of cells: 120961

Technology: 10x, single-cell RNA-seq

Diseases: Lung Adeno.

Sample types: Primary tumor, normal

Sample info: Human lung adenocarcinoma primary and normal samples (not all matched). 20 samples (10 tumor, 10 normal) from 12 patients.

Notes: Cell annotations are from the original dataset.
